

Claims

- [c1] A method to provide a remote control unit and transmitter for hookup and operation of electrical applications and capable for use on board boats, said remote control unit comprising: a PVC container (UL Listed Marine quality), weather proof 18 gauge wire, marine grade wire seals, 30-amp relay, inline fuse, 12 volt multi-channel receiver and transmitter.
- [c2] A method according to claim 1 wherein the unit is easily mounted and wired to power source. Wiring for remote operation can be performed in many ways; remote activation causes the N/O relay to close activating the electrical application.
- [c3] A method according to claim 1 wherein the unit and transmitter can activate from one to four different electrical applications depending on need.
- [c4] A method according to claim 1 wherein the units range can be extended by using various receivers and transmitters.
- [c5] A method according to claim 1 wherein the unit is comprised of components designed to withstand the condi-

tions of the marine environment.
